Abstract

The problem in this research is the implementation of Islamic guidance & counseling in upholding student discipline in MTs. Al Washliyah Gading Tanjungbalai. This study aims to establish the condition of student training, the application of Islamic advice conducted by guidance & counseling teachers, the implementation of Islamic guidance & counseling in raising student discipline in MTs. Al Washliyah Gading Tanjungbalai. This research is phenomenological in a qualitative approach. The collecting data used observation, interview, and documentation. In analyzing the data, the researcher used qualitative analysis with steps of data exposure, data reduction, and conclusion description. The results of this study are: (1) the condition of the student discipline is quite good (2) the implementation of Islamic guidance & counseling conducted by teachers in optimally (3) the application of Islamic guidance & advice in upholding student discipline ineffectively.

Keyword: Discipline, Islamic Guidance & Counseling, Islamic Advice

INTRODUCTION

The school has never detached from the name of rules and regulations that must be complied with by all personnel who are in it, from school principals, officers working in schools, teachers, and students who learn and study knowledge in the school. The regulations are made to be obeyed and executed with reasonable use. The provisions made so that we care more about the rules that enforced wherever we are. The school rules or orders made so that students can embed a disciplined attitude within them. The high discipline will be able to deliver students to their success. The control should be applied in every school so that all learning and vision and mission of the school in producing students and students who are superior and run well and get results under hope.

In enforcing the discipline of the students need extra cooperation from all school personnel. The learners need direction and counsel to understand the nature and benefits of the control. One way to give students an understanding of the enforcement of discipline is to conduct

counseling. The counseling is expected not only to help learners solve the problem but also achieve optimal self-realization by the foundation of Islamic values. Under the statement Erhamwilda (2009:95) that Islamic counseling considered as a personal contact process between individuals or groups of individuals who have difficulty in a problem with a professional officer in terms of problem-solving, self-introduction, self-adjustment and self-direction to achieve optimal self-realization according to Islamic teachings.

Islamic counseling is an appropriate aid given to enforce discipline towards learners. Through the implementation of Islamic advice, learners are given an understanding of himself and his duties and responsibilities as beings of God. It expected that after getting the student, Islamic counseling could plan a more regular life and instill a breathing pattern of discipline over its consciousness. Therefore, Islamic counseling conducted by tutoring and counseling teachers should be done effectively so that the objectives fulfilled as appropriate.

Based on the results, the researchers saw several students who violated the school order on the observation, researchers have determined that the level of discipline of students in MTs. Al Washliyah Gading Tanjungbalai is still low because it does not have an indicator of control. The student discipline indicators such as completing the task in time, keeping up with friends to make all the assignments of the class well done, invite each other to maintain class order, remind friends who violate rules with polite and unoffensive words, dress modestly and neatly and obey school rules.

The discipline at MTs. Al Washliyah Gading Tanjungbalai still needs to be built and need guidance by tutoring and counseling teachers, if allowed, the learners will fail in the learning because discipline strongly determines the success of a student, for example at MTs. Al Washliyah Gading Tanjungbalai when students arrive late to school then students will be given Islamic counseling by the guidance teacher and advice that consequently students missed the lesson on the first lesson hours, therefore teacher and counseling assistance is very important in helping learners to address issues that often occur, so that violations, the learners do not get higher. The discipline in the student MTs. Al Washliyah Gading Tanjungbalai still needs to be built and need guidance by tutoring and counseling teachers, if allowed, the learners will fail in the learning because discipline strongly determines the success of a student, for example at MTs. Al Washliyah Gading Tanjungbalai when students arrive

late to school then students will be given Islamic counseling by the guidance and counseling teacher that consequently, students missed the lesson on the first lesson hours, therefore teacher and counseling assistance is very important in helping learners to address issues that often occur, so that violations The learners do not get higher. The importance of discipline, teacher guidance and counseling can provide appropriate Islamic advice & counseling in enforcing the training of students of MTs. Al Washliyah Gading Tanjungbalai.

METHOD

The method of study used is qualitative with a phenomenological approach. The primary data source in this study is the head of MTs. Al Washliyah Gading Tanjungbalai, administration staff, tutoring, and counseling teachers and learners. The secondary data sources are documents and archives of guidance and counseling MTs. Al Washliyah Gading Tanjungbalai. The data analysis procedures take place gradually as long as the research initiated from data reduction, data presentation, and conclusion. According to Moleong (2000:3) as a result of qualitative research is a research procedure that generates descriptive data in the form of written or spoken words from people and attitudes that observed. The validity of data using data triangulation compares the data of interviews, contrasting with what people publicly say with what is said personally and comparing one's circumstances and perspectives to various opinions of people like ordinary people.

RESULTS AND DISCUSSION

Based on information from all data sources can be understood that MTs. Al Washliyah Gading Tanjungbalai has a good student discipline because it is still found by learners who violate the Madrasah rules such as the Untidy dress, come late to the madrasah, do not do the assignment of the house, unplug and smoke outside the madrasah environment. An indicator of students ' discipline among others is completing the task in time, keeping up with friends so that all class assignments are carried out well, invite friends to keep class order, remind friends who violate rules with polite and unoffensive words, dressed modestly and neatly and obeying school rules.

The implementation of counseling applied in MTs. Al Washliyah Gading Tanjungbalai is Islamic guidance & advice. Although in its implementation, it is not a maximum of factors such as guidance &

counseling teacher that have no qualifications so that counseling provided incidental, which adapts to the needs of the students not yet programmatic, the madrasah demands that the teacher guidance & advice as a teacher of subjects as well as the attitude of learners who still consider the teacher guidance & counseling is the most feared teacher. The obstacles that implement Islamic guidance & advice conducted by leadership & counseling teacher have not walked with the maximum – efforts guidance & counseling at MTs. Al Washliyah Gading Tanjungbalai only handles the problematic students not functioning as a precautionary.

The student is also able to apply the counseling results they receive in daily life, but still, some students violate the rules of the madrasah. The implementing and providing Islamic guidance & counseling to students by teachers, must certainly provide maximum effort to address the problems that exist in learners, especially issues related to discipline learners. The student should get more guidance and attention for students to apply and implement the discipline that is in the madrasah well – the implementation of Islamic counseling in the subject of students in MTs. Al Washliyah Gading Tanjungbalai is not yet running with maximum. The Islamic advice conducted by guidance & counseling teacher has not been able to enforce the discipline of learners in MTs. Al Washliyah Gading Tanjungbalai.

CONCLUSION

The discipline of the learners in MTs. Al Washliyah Gading Tanjungbalai is good enough, although there are still some among the few students who are still existing students who violate the discipline that has been made by the school because there are students and have not been able to do well with the environment and regulations in the schools. When the teacher is not in the classroom that makes the student noisy, and there are still some students who are late to school every morning, and there are always students who are less presentable. The implementation of Islamic counseling services at MTs. Al Washliyah Gading Tanjungbalai has not been working correctly, because Islamic counseling that incidental when the problem arises among learners, instead of functioning as prevention. The implementation of Islamic advice is not running with maximum also influenced several factors such as teachers guidance & counseling that do not have undergraduate qualifications guidance & counseling, unavailability of hours of guidance & advice, demands the madrasah who made tutoring teachers & counseling as a teacher of subjects as well as the

attitude of learners who still considered tutoring is the most feared teacher. The guidance & counseling teacher has not provided services to the student.
